

10 COMMANDMENTS FOR THE GOOD SHEPARD OF TOR

1. Thou shall not invoke the word evaluation in vain: the word evidence is more recommended nowadays
2. Thou shall not invoke methods without any substantial understanding of what they can do or cannot do
3. Thou shall not abuse the efficiency- effectiveness duo unless you want to run the risk somebody will ask you what they mean
2. Thou shall not set unrealistic deadlines just because you need to boost absorption or because you are running behind yourself

6. Thou shall not mention data unless you know something about data.
7. Thou shall not ask (even implicitly) for dishonest answers to your evaluation questions.
8. Thou shall not pretend you have TITLE (True Intent To Learn from Evaluation) if you do not.
9. If you do not have title, limit yourself to present the information you were able to put together, and resist the temptation of reaching conclusions that are not based on solid evidence

10. remember: this could easily become a serious profession, as long as every body at every step would take seriously what they are doing, starting from the bloody
